Abstract

2108955

The " R " Golfball consists of the following components.

1. Golfball of normal specification and use for outdoor Golf Play.
2. Peg or Stake consisting of either Wood, Plastic or Metal with dimensions of approximately 5' in length and 2½" in Diameter.
3. Elastic Band consisting of a mix of textured polyester and rubber approximately 6' - 8' in length which when tension is applied expands to 12' - 24' in length.

Specifications

The "R" Golfball Retrievable practice Golfball aid is described through the assembly of all 3 elements of the products parts. (Golfball, Peg and Elastic)

The assembly of the parts and the application can be described as follows;

- * Taking one end of the elastic band and affixing it to the Golfball using a 1" screw and then sealing open hole area using clear silacone gel.

- * Taking end two of the elastic band and securing it to the peg using a double tie knot.

The "Usefulness" of the "R" Golfball as a practice golfball aid can be described by;

1. Securing "Peg" into ground in an area of not less than 900 square feet (30'x30')
2. Placing the "R" Golfball out from the peg to the full extension of the elastic band (6'-8')
3. Taking a Golfclub you can now strike the "R" Golfball and repeat to strike the "R" Golfball using and practicing with all various Golfclubs for the sole purpose of practising all different Golf Shots.

" Upon Striking the " R" Golf Ball the Golf Ball Projects upward and outward expanding the elastic cord to extension, then. returning back towards the peg and resting to a stop."
